

To All Our
CUSTOMERS

Nerviano, 11th February 2026

OBJECT: REACH Declaration - Registration, Evaluation, Authorisation and Restriction of Chemicals - European Regulations EC 1907/2006

Concerning all the commitments regarding the application of the REACH regulations (EC 1907/2006), we would like to inform you that Gammacril has already undertaken all the possible actions with the aim to fulfil the above mentioned normative.

Such regulations preview the substantial distinction among **substances, preparations and articles**. The REACH application concerns the substances. The preparations are taken in consideration if they are imported from a no EU State Member, while it doesn't preview any form of pre-recording or recording for the preparations produced in a EU State Member and the articles.

Gammacril, being a producer of acrylic rods and tubes and polycarbonate tubes, during all its manufacturing processes doesn't modify in any way the chemical nature of the raw materials, and for this reason we are not obliged to REACH recording of our products.

Gammacril products do not contain substances currently defined (*updated to February 4th 2026* for the Candidate List of 253 substances) by ECHA (European Chemicals Agency) as Substances of Very High Concern (SVHC) above the applicable threshold of 0.1%.

However, we still continue to keep in contact with our feedstock suppliers and we will provide all our customers with data regarding the possible presence of new SVHC substances from the next Candidate List updates, if they appear in one of our products we supply to you.

Best regards

Gammacril s.r.l.
