Palram Industries Ltd.

Palram Industries Regulatory Data Sheet

Update: June 2026

Regulatory Compliance Overview

Palram Industries Ltd is committed to ensuring that our products meet the highest standards of applicable environmental and chemical safety regulations. This Regulatory Data Sheet provides a comprehensive overview of Palram's compliance with various international regulations. Each regulation is addressed in a separate paragraph, detailing Palram's compliance status.

The following regulations are covered in this document:

- Animal derivatives
- BPA
- BREEAM A20
- EUDR
- MCCPs
- Microplastics
- PFAS
- Phthalates
- POPs
- REACH – SVHC Candidate List
- REACH Annex XIV
- REACH Annex XVII
- RMI
- RoHS
- TSCA

Animal derivatives

Most of the raw materials used in the manufacture of Palram products are free from animal derivatives.

Where animal-derived raw materials may be present, Palram has been informed by its suppliers that such materials are chemically altered from their original structure during the manufacturing process. Therefore, disease transmitters are inactivated.

BPA (Bisphenol A)

Palram ensures that our products comply with BPA regulations under TSCA Section 6(h) and the REACH regulation. Our products do not contain BPA above the regulatory limits.

BREEAM A20

Palram products do not intentionally contain substances restricted under the BREEAM A20 requirements above applicable thresholds.

European Regulation on Deforestation Free-Products (EUDR)

The European Union has adopted the EU Deforestation Regulation, Regulation (EU) 2023/1115, to reduce the EU's contribution to global deforestation and forest degradation.

This regulation requires companies to ensure that certain raw materials and products, such as soy, palm oil, cattle, coffee, cocoa, rubber and timber, placed on the EU market have not been produced on land, deforested after 31 December 2020.

The EU has amended the implementation timeline. The current entry into application is 30 December 2026 for large and medium operators, and 30 June 2027 for micro and small operators. Palram continues to monitor regulatory developments relating to EUDR.

MCCPs (Medium-Chain Chlorinated Paraffins)

Palram products comply with applicable restrictions relating to MCCPs under REACH Annex XVII and TSCA. We ensure that our products do not contain MCCPs above the regulatory limits.

Microplastics - REACH Annex XVII Entry 78

Palram manufactures finished articles outside the EU. These products do not fall within the scope of REACH Annex XVII, Entry 78 on synthetic polymer microparticles. Therefore, the restriction and reporting obligations to ECHA do not apply.

Palram is not responsible for improper use, treatment, or disposal of packaging or waste. It is the customer's responsibility to dispose of packaging and waste materials properly and in accordance with applicable local regulations. Detailed information can be found on the relevant Product Safety Data Sheet (PSDS), where applicable.

PFAS (Per- and polyfluoroalkyl substances)

PFAS are not intentionally used in the manufacturing process of Palram sheets.

Based on supplier declarations and the information available to Palram, PFAS are not expected to be present in Palram products above ubiquitous* levels.

*With respect to a chemical substance, the word "ubiquitous" means that the substance may be naturally present in the environment and could be detectable as trace contamination. Such trace levels cannot be prevented through technical, physical, or physicochemical measures. The analytical determination of all ubiquitous substances is not part of Palram's routine process monitoring or delivery specifications.

Phthalates

Palram products comply with applicable requirements under REACH Annex XIV, REACH Annex XVII, RoHS 3, and the US Consumer Product Safety Improvement Act (CPSIA) Section 108, which regulate the use of certain phthalates. We ensure that Palram products do not contain regulated phthalates above applicable concentration limits.

Persistant Organic Pollutants (POPs)

We confirm that Palram products do not intentionally contain substances listed in Annex I of Regulation (EU) 2019/1021.

REACH– SVHC Candidate List

Palram products are defined as "Articles" under REACH, with no intended release of substances from the polymeric matrix under normal and reasonably foreseeable conditions of use. Therefore, to the best of Palram's knowledge, substances contained in Palram products are not subject to registration obligations under Article 7(1) of REACH.

Palram monitors the SVHC Candidate List, which is updated by ECHA according to Article 59 of REACH. Based on the latest information provided by Palram's suppliers, and Palram's review of the Candidate List, including the February 2026 update, Palram products do not intentionally contain listed SVHC substances in concentrations equal to or greater than 0.1% w/w.

The presence of analytically detectable traces, which have possibly been introduced via raw materials, auxiliaries and additives, cannot be excluded. Specific analyses to measure such traces have not been performed.

REACH - Annex XIV Authorization List

REACH Annex XIV lists substances of Very High Concern (SVHCs) that require authorization before they may be used or placed on the market in the European Union. Palram products do not contain substances listed in REACH Annex XIV Authorization list.

REACH - Annex XVII Restriction List

REACH Annex XVII contains restrictions on the manufacture, placing on the market, or use of specific substances, mixtures, or articles within the European Union. Restrictions can apply to specific uses, concentration thresholds, or even complete bans, and they are legally binding.

We ensure that Palram products do not contain restricted substances for use in plastic sheets above applicable concentration thresholds.

RMI (Responsible Minerals Initiative)

Palram Industries Ltd. Declares compliance with the Responsible Minerals Initiative (RMI) including Conflict Minerals and Extended Minerals.

This ensures responsible sourcing practices in line with the principles of addressing ethical, social and environmental aspects of mineral sourcing throughout its supply chain. This compliance is aligned with the due diligence principles reflected in the US Dodd-Frank Act and Regulation (EU) 2017/821, which addresses responsible sourcing of Conflict Minerals.

RoHS (Restriction of Hazardous Substances Directive)

Palram products comply with the RoHS Directive 2011/65/EU, as amended, including Directive (EU) 2015/863, commonly referred to as RoHS 3. We ensure that no substances listed in RoHS Annex II are present in Palram products above the specified concentration limits.

TSCA (Toxic Substances Control Act)

Palram products comply with applicable TSCA requirements, including Title VI Part 770 and Section 6(h) for Persistent, Bioaccumulative, and Toxic (PBT) chemicals.

Disclaimer:

The information contained in this Regulatory Data Sheet applies to products produced by Palram at the time of publication. The variety of regulations and regulatory regimes listed may not be relevant to every specific Palram product. Palram Industries Ltd., to the best of its knowledge, believes that the information provided above is accurate and correct based on the sources available at the time of writing.

Palram is a manufacturer of articles, and its regulatory statements are based on and reliant upon declarations, safety data sheets, technical information, and regulatory statements provided by its raw material suppliers. Due to the scope of regulations, rapid changes in regulatory requirements, and the large number of suppliers, Palram conducts a regulatory review with its suppliers annually and publishes this document once a year. This document supersedes all previous versions issued prior to the effective date. Palram does not assume liability for the use of this information or for any claims or damages from any third party.

This document does not cover certain complementary products, accessories, or externally sourced components that may be included in broader product offerings. For regulatory information on such items, please contact us directly.

For further details and inquiries regarding regulatory matters, or any specific product, please contact us at: Regulations@palram.com
