

DATE: 11.07.2023

Dear Sirs,

We can confirm that we strive to add a certain level of recycled material to all our Lumex products both Lumex A and Lumex G. These levels may vary depending on the thickness of the finished sheet. We can achieve between 5 – 10% of recycled polymer, depending on the optical/physical properties being well within tolerances. Both Lumex A and Lumex G are 100% recyclable into themselves. This is part of our in house policy to take care for the environment by using all waste material produced on our site.

Thank you for your confidence in our products.

Best Regards,

---
