

MAPLON®

TOTAL OPAQUE

THE PERFECT SUBSTRATE
FOR ALL YOUR SIGNAG
AND P.O.P NEEDS

100% Recyclable
Environmentally Friendly

The MAPLON white total opaque is 100% recyclable and environmentally friendly. it is an excellent replacement for PVC and Styrene for a more sustainable printing industry.

The MAPLON is the ideal substrate for double sided POS work that need high quality printing and durability.

The MAPLON is more flexible than standard print grade PVC and will not crack or chip like Styrene.

- 100% Recyclable
- No light transmission, fully opaque (0% LT)
- Perfect for double sided printing.
- Excellent ink adhesion and reduced ink consumption.
- High impact and cracking resistant, will not crack or chip as Styrene.
- UV resistant, 1 year outdoor durability as standard (up to 5 years outdoor durability upon request).
- No fading or yellowing with time.
- Unique formulation using superior raw materials.
- Fine embossing, smooth surface with low roughness value (RA) to give a sharp and vivid printing image.
- Suitable for UV Digital Silk Screen, Offset and other printing technologies.
- 1 year guarantee on corona treatment for a long shelf life.
